Preface iii

I Introduction and Motivation 1

1 Introduction 3

1.1 A Simple 2-period-lived Example 4

1.2 Equilibrium Solution 5

1.3 Perfect Foresight versus Uncertainty 6

1.4 Outline 7

II Simple OG Model with Exogenous Labor Supply 9

2 3-period-lived Agents with Exogenous Labor Supply 11

2.1 Households 12

2.2 Firms 17

2.3 Market clearing 18

2.4 Equilibrium 18

2.5 Solution method: time path iteration (TPI) 21

2.6 Calibration 24

2.7 Exercises 24

3 *S*-period-lived Agent Problem with Exogenous labor Supply 27

3.1 Households 27

3.2 Firms . . . 32
3.3 Market clearing . . . 33
3.4 Equilibrium . . . 33
3.5 Solution method: time path iteration (TPI) . . . 36
3.6 Calibration . . . 38
3.7 Exercises . . . 38

III Endogenous Labor and Heterogeneous Ability 43

4 *S*-period-lived Agents with Endogenous Labor 45
4.1 Disutility of labor . . . 45
4.2 Households . . . 50
4.3 Firms . . . 51
4.4 Market Clearing . . . 52
4.5 Equilibrium . . . 52
4.6 Solution Method . . . 55
4.7 Calibration . . . 65
4.8 Exercises . . . 68

5 *S*-period-lived Agents with Endogenous Labor and Dynamic Firms 73
5.1 Households . . . 73
5.2 Firms . . . 75
5.3 Market Clearing . . . 80
5.4 Equilibrium . . . 80
5.5 Solution Method . . . 82
5.6 Calibration . . . 91
5.7 Exercises . . . 95

6 *S*-period Lives, Endogenous Labor, and Heterogeneous Abilities 99
6.1 Heterogeneous lifetime ability paths . . . 99
6.2 Households . . . 101

6.3 Firms . . . 103
6.4 Market clearing . . . 104
6.5 Equilibrium . . . 104
6.6 Solution Method . . . 107
6.7 Calibration . . . 117
6.8 Exercises . . . 117

7 Simple Stochastic Ability **121**
7.1 Households . . . 121
7.2 Firms . . . 125
7.3 Market clearing . . . 126
7.4 Equilibrium . . . 127
7.5 Solution Method . . . 128
7.6 Exercises . . . 135

IV Population Dynamics, Productivity Growth, and Stationarization **137**

8 *S*-period-lived Agent Problem with Exogenous Labor Supply, Demographic Dynamics, and Productivity Growth **139**
8.1 Population Dynamics . . . 140
8.2 Households . . . 141
8.3 Firms . . . 144
8.4 Market clearing . . . 144
8.5 Equilibrium . . . 146
8.6 Solution method: time path iteration (TPI) . . . 152
8.7 Calibration . . . 156
8.8 Exercises . . . 167

V Bequests **173**

9 *S*-period Lives, Exogenous Labor, Intended Bequests **175**

9.1 Bequest Data . . . 175
9.2 Households . . . 177
9.3 Firms . . . 181
9.4 Market clearing . . . 182
9.5 Equilibrium . . . 182
9.6 Solution method: time path iteration (TPI) . . . 185
9.7 Calibration . . . 188
9.8 Exercises . . . 188

10 *S*-period Lives, Exogenous Labor, Bequests with Population Dynamics **193**

11 Bequests with Population Dynamics, Endogenous Labor, and Heterogeneous Abilities **195**

VI Household taxes and government budget constraint **197**

12 Household taxes **199**

12.1 Incorporating Tax Functions into DGE Model . . . 199
12.2 Households . . . 219
12.3 Firms . . . 222
12.4 Government balanced budget . . . 222
12.5 Market Clearing . . . 223
12.6 Equilibrium . . . 223
12.7 Solution Method . . . 226
12.8 Calibration . . . 232
12.9 Exercises . . . 232

13 Unbalanced government budget constraint **233**

13.1 Households . . . 233

13.2 Firms . . . 235
13.3 Government . . . 236
13.4 Market Clearing . . . 238
13.5 Equilibrium . . . 238
13.6 Solution Method . . . 242
13.7 Calibration . . . 252
13.8 Exercises . . . 254

14 Modeling Social Security and pension systems **257**

VII Multiple industries, multiple goods **259**

15 Two Industries, Two Goods, Three-period-lived agents **261**
15.1 Households . . . 261
15.2 Firms . . . 267
15.3 Market clearing . . . 269
15.4 Equilibrium . . . 271
15.5 Solution method . . . 272
15.6 Calibration . . . 276
15.7 Exercises . . . 276

16 Multiple Static Industries **277**
16.1 Household Industry-specific Consumption . . . 277
16.2 Household Composite Consumption . . . 279
16.3 Industries and Firms . . . 281
16.4 Market Clearing . . . 282
16.5 Equilibrium . . . 283
16.6 Solution Method . . . 285
16.7 Calibration . . . 289
16.8 Exercises . . . 289

17 Multiple Static Industries, Endogenous Labor **291**

17.1 Household Industry-specific Consumption 291

17.2 Household Composite Consumption and Labor 294

17.3 Industries and Firms 296

17.4 Market Clearing 299

17.5 Equilibrium 300

17.6 Solution Method 302

17.7 Calibration 315

17.8 Exercises 315

18 Multiple industries, Multiple Goods, and *S*-period-lived individuals **317**

18.1 Households 317

18.2 Firms 322

18.3 Market clearing 323

18.4 Equilibrium 325

19 Multiple dynamic industries, Multiple Goods, and *S*-period-lived individuals **327**

VIII International markets **329**

20 Small Open Economy OG Model **331**

20.1 Households 331

20.2 Firms 332

20.3 Market Clearing 333

20.4 Equilibrium 333

20.5 Solution Method 336

20.6 Calibration 341

20.7 Exercises 344

21 Multi-country (Large Open Economy) OG Model **347**

21.1 Households . . . 348

21.2 Firms . . . 353

21.3 Market Clearing . . . 359

21.4 Equilibrium . . . 361

21.5 Solution Method . . . 362

21.6 Calibration . . . 364

21.7 Exercises . . . 365

IX Aggregate Shocks, Asset Pricing, and Adaptive Expectations **367**

22 Aggregate Shocks, 2-period Model **369**

22.1 Households . . . 371

22.2 Firms . . . 373

22.3 Market clearing . . . 374

22.4 Equilibrium . . . 374

22.5 Solution Method . . . 375

23 Aggregate Shocks, S-period Model **379**

23.1 Households . . . 379

23.2 Firms . . . 381

23.3 Market clearing . . . 382

23.4 Equilibrium . . . 382

23.5 Solution Method . . . 384

24 Asset Pricing **391**

25 Adaptive Expectations **393**

X Monetary Policy **395**

26 Monetary Policy **397**

XI Calibration **399**

27 Labor supply distribution **401**

28 Wealth distribution **403**

Appendices **407**

A Derivations **407**

A.1 Properties of the CES Production Function 407

B Endogenous Grid Method **409**

B.1 Final two periods of life solutions: ages *S* and *S-1* 409

C Using Python **413**

C.1 Installing Python 413

C.2 Learning Python 414

C.3 Principles of Writing Good Code 415

C.4 Running Python 416

C.5 Debugging 418

C.6 Python cheat sheet 418

C.7 Optimization: Root Finders and Minimizers 418

D Using `Git` and GitHub.com **421**

D.1 Why Not Use Dropbox or Google Docs? 422

D.2 Installing `Git` and Settings 424

D.3 `Git` and GitHub Structure, Workflow 424

D.4 `Git` Cheat Sheet Commands 433

D.5 Using GitHub for Collaborative Issue Tracking 434

E Calibration **437**

E.1 Initial period labor supply Euler equations 437

E.2 Alternative Explanation/Derivation 440

F Tax Data with Tax-Calculator **445**

F.1 TaxBrain Web Application 445

F.2 Command Line Interface (CLI) 445

F.3 Python Application Program Interface (API) 445

F.4 Exercises 446
